What is AGM Battery Technology? - Panels and More
What is AGM technology? Absorbed Glass Mat batteries are constructed differently than the traditional flooded battery. This write-up covers mainly the Concorde Sun-Xtender AGM's, but also applies to most other brands of deep cycle AGM batteries.

MotoMaster Nautilus Ultra Group 31 AGM Deep Cycle Battery

This AGM battery, being sealed and VRLA (valve-regulated), is a much better choice than a typical flooded/wet deep cycle battery. Flooded batteries naturally vent their gasses by design. This AGM battery is designed to recombine gasses inside the battery. Note, while an AGM battery does not normally gas, it will (to relieve internal pressure) if overcharged for example. For this reason, we

AGM Batteries | RV and Marine Deep Cycle AGM Battery

Deep cycle AGM marine batteries are sometimes referred to as dry cell batteries, non-spillable batteries, regulated valve batteries, or maintenance free batteries. They are often interchangeable with gel cell batteries.

deep cycle battery agm vs standard which battery is better?

Deep cycle batteries are available in standard, flooded type lead acid batteries and AGM absorbed glass mat chemistry. The benefits of AGM deep cycle batteries are the slow self discharge rate.

Absorbent Glass Mat (AGM) Battery Information - Battery ...

The leading advantages of AGM are a charge that is up to five times faster than the flooded version, and the ability to deep cycle. AGM offers a depth-of-discharge of 80 percent; the flooded, on the other hand, is specified at 50 percent DoD to attain the same cycle life.
