[Congestive Heart Failure: Symptoms, Causes and](#)

### Treatment

Congestive heart failure is a chronic or acute syndrome that affects the ability of the heart muscles to pump properly; Also known simply as heart failure, this condition manifests when there's fluid buildup around the heart, causing the heart muscles to pump inefficiently

### Heart failure - Symptoms and causes - Mayo Clinic

Heart failure, sometimes known as congestive heart failure, occurs when your heart muscle doesn't pump blood as well as it should. Certain conditions, such as narrowed arteries in your heart (coronary artery disease) or high blood pressure, gradually leave your heart too weak or stiff to fill and pump efficiently.

### Heart Failure: Symptoms, Stages, and Treatment | Health

Heart failure, also known as congestive heart failure, is a condition in which the heart muscle struggles to pump enough blood to meet the body's needs. Heart failure symptoms can include
