Ductless Vs Ducted Heat Pumps What's the Difference?

The ductless mini split heat pump is probably the most popular type of heat pump available. The interior of the home has a head unit, which is mounted on the wall. An accompanying unit is installed on the exterior of the home. This two-part system works together to extract heat from the outdoors and bring it indoors to warm the air.

Ductless Mini-Split Heat Pump - Efficiency Nova Scotia

Rebates and financing to help you switch to a ductless mini-split heat pump - and start saving money! Efficient heating systems like ductless heat pumps can save you hundreds of dollars per year, using less energy.

How Does a Ductless Mini Split Heat Pump Work?

Ductless mini-split heat pumps are more energy efficient, all things being equal, than other conventional home heating solutions. Because they are not producing heat they are moving heat they offer those with electric baseboard or other inefficient home heating systems a better solution. There is potential for a lot of savings with the installation of a ductless mini-split heat pump.

Ductless, Mini-Split Heat Pumps | Department of Energy

Ductless, mini-split-system heat pumps (mini splits) make good retrofit add-ons to houses with "non-ducted" heating systems, such as hydronic (hot water heat), radiant panels, and space heaters (wood, kerosene, propane).

Ductless Heat Pump Cost - ImproveNet

Ductless Heat Pump Cost: Coming in at a few thousand dollars, mini split heat pumps can be expensive to install. While ductless heat pumps cost less to run, it may be a while until you see a return on investment.

Is Ductless Heating and Cooling Right for You? - hgtv.com

A ductless heat pump or air conditioner typically consists of a wall-mounted indoor unit combined with an outside compressor. It's most often used in a situation where a window AC unit or baseboard heating would be considered, such as a new addition to a house.
