Brewing A Personal blog

I insulated the brewing container with an old bed sheet and on top of that added a layer of aluminium foil, and filled the container with 25 liters of water, and measured the temperature to be at 19,2 C and left the container in a room at around 24,5 C.

brewing A Personal blog

I have built control systems based around Arduino before and this time it will be for brewing lager. The reason being that lager requires cold temperatures.

Where High Volume Meets Precision Brewing.

Where High Volume Meets Precision Brewing. The Omega high volume coffee brewing system is designed to optimize coffee quality while reducing maintenance and service. On-board self-diagnostics continually sense proper brewing operations and displays a message to alert the operator if an action is required or preventative maintenance is needed. Curtis Omega systems are factory set for out-of-
