#### [What is MS? MS Society of Canada](#)

Canada has one of the highest rates of multiple sclerosis (MS) in the world, with an estimated 1 in every 385 Canadians living with the disease. While it is most often diagnosed in young adults aged 20 to 49, younger children and older adults are also diagnosed with the disease.

#### [Multiple sclerosis - Symptoms and causes - Mayo Clinic](#)

Multiple sclerosis (MS) is a potentially disabling disease of the brain and spinal cord (central nervous system). In MS, the immune system attacks the protective sheath (myelin) that covers nerve fibers and causes communication problems between your brain and the rest of your body.

#### [Multiple sclerosis - Wikipedia](#)

Multiple sclerosis (MS) is a demyelinating disease in which the insulating covers of nerve cells in the brain and spinal cord are damaged. This damage disrupts the ability of parts of the nervous system to communicate, resulting in a range of signs and symptoms, including physical, mental, and sometimes psychiatric problems.

#### [What Is Multiple Sclerosis? - Health](#)

What is multiple sclerosis? MS is a disease in which the immune system damages the myelin, or outer coating, in the brain and the spinal cord, affecting how nerves communicate with each other.

#### [Multiple Sclerosis - Canada.ca](#)

Multiple sclerosis (MS) is a disease of the central nervous system. The immune system attacks myelin (protective covering of the nerves) in the brain, spinal cord, and optic nerves, which disrupts communication between the central nervous system and the rest of the body.

#### [Multiple sclerosis: Are we close to a cure? - Health News](#)

Multiple sclerosis (MS) is a potentially disabling disease that affects the brain and spinal cord. Around 400,000 people are living with MS in the United States and approximately 2.1 million.

#### [Multiple Sclerosis \(MS\) Symptoms & Early Warning Signs of MS](#)

People with multiple sclerosis (MS) tend to have their first symptoms between the ages of 20 and 40. Usually the symptoms get better, but then they come back. Some come and go, while others linger.

#### [Multiple Sclerosis: Symptoms, Causes and Treatment](#)

Multiple sclerosis is an autoimmune disorder that causes problems in your brain, spinal cord and central nervous system, and is classified into five types.

#### [Multiple sclerosis diagnosis - Wikipedia](#)

Multiple sclerosis diagnosis can only be made when there is proof of lesions disseminated in time and in space. Therefore, when damage in the CNS is big enough to be seen, it would be desirable to make it faster.

#### **What Is MS? : National Multiple Sclerosis Society**

Multiple sclerosis (MS) is an unpredictable, often disabling disease of the central nervous system that disrupts the flow of information within the brain, and between the brain and body. WILLIAM diagnosed in 2002

#### **16 Early Symptoms of Multiple Sclerosis - Healthline**

Multiple sclerosis (MS) is a progressive, immune-mediated disorder. That means the system designed to keep your body healthy mistakenly attacks parts of your body that are vital to everyday function.

#### **Multiple sclerosis - Diagnosis and treatment - Mayo Clinic**

Instead, a diagnosis of multiple sclerosis often relies on ruling out other conditions that might produce similar signs and symptoms, known as a differential diagnosis. Your doctor is likely to start with a thorough medical history and examination.

#### **MS Society of Canada**

The Multiple Sclerosis Society of Canada is an organization founded by volunteers and continually fueled by the initiative and dedication of thousands of volunteers across the country. Become a volunteer. Donate. With your support, the MS Society of Canada is committed to improving the lives of Canadians with multiple sclerosis and accelerating the high-quality research that could end MS.

#### **Multiple Sclerosis: What is MS? Overview, Risk Factors ...**

Multiple sclerosis, or MS, is a long-lasting disease that can affect your brain, spinal cord, and the optic nerves in your eyes. It can cause problems with vision, balance, muscle control, and

#### **What is multiple sclerosis? - CNN**

Multiple sclerosis is a disease that affects the central nervous system and is considered an autoimmune disease, in which the immune system attacks its own healthy cells. It affects quality of
