including the item content, response options, and interpretation of results. Additionally, the General Occupational Themes, Basic Interest Scales, Personal Style Scales, and administrative indexes all remain the same. Only

Strong Interest Inventory - Wikipedia

The Strong Interest Inventory is an interest inventory used in career assessment. As such, career assessments may be used in career counseling. The goal of this assessment is to give insight into a person's interests, so that they may have less difficulty in deciding on an appropriate career choice for themselves. It is also frequently used for educational guidance as one of the most popular career assessment tools. The test was developed in 1927 by psychologist Edward Kellogg Strong, Jr. to help
