[Universal remote - Wikipedia](#)

A universal remote is a remote control that can be programmed to operate various brands of one or more types of consumer electronics devices. Low-end universal remotes can only control a set number of devices determined by their manufacturer, while mid- and high-end universal remotes allow the user to program in new control codes to the remote.

[Using a Microsoft remote control in Windows - Official ...](#)

This article applies to remote controls that use the Microsoft eHome device driver. If you are unsure whether your remote is an eHome remote look in the Device Manager under Human Interface Devices and see if there is a device called "Microsoft eHome Infrared Transceiver" or something similar.
