There are four stages of heart failure, which are A, B, C and D, with patients in A and B not having heart failure yet but demonstrating risk factors for the development of heart failure, according to American Family Physician.

[Congestive heart failure: Life expectancy and stages](#)

Congestive heart failure is a progressive disease that causes the heart to weaken, making it difficult to pump blood around the body. In this article, we look at the symptoms, stages, and life

[12 Symptoms of Congestive Heart Failure Daily Health ...](#)

In the case of congestive heart failure, the opposite is true.

The heart is pumping far more blood than necessary and the heart becomes overworked to keep up with the increased flow. Congestive heart failure can occur due to the blood or serum infusions, kidney disease, chronic severe anemia or a number of other conditions. Heart failure can lead to the build-up of fluids in the body such as

[12 Causes of Congestive Heart Failure | ActiveBeat](#)
Hypertension, or high blood pressure, refers to elevated

pressures in the blood flowing through the arteries of the body. Blood pressure is highest when the heart is contracting, and gives rise to the systolic blood pressure (SBP). The heart relaxes between beats causing the blood pressure to fall

[Congestive Heart Failure Life Expectancy: 4 Facts | Griswold](#)

Congestive heart failure is a progressive condition that worsens over time, especially if it goes unchecked. With congestive heart failure, the heart is weakened due to a number of conditions ranging from high blood pressure to coronary artery disease. Due to this weakness, the heart can't pump blood throughout the body at a normal rate, building pressure in the heart and reducing the

[Heart failure - Wikipedia](#)

Terminology. Heart failure is a pathophysiological state in which cardiac output is insufficient to meet the needs of the body and lungs. The term "congestive heart failure" is often used, as one of the common symptoms is congestion, or build-up of fluid in a person's tissues and veins in the lungs or other parts of the body. Specifically

[What is Congestive Heart Failure - Stages, Causes, Signs ...](#)

Congestive heart failure is a type of heart failure which requires seeking timely medical attention, although sometimes heart failure and congestive heart failure, the two terms are used interchangeably.
